## Our core services explained

### Market assessment

Know the best deal for you. Utilising grouped tenders as well as market trends we seek offers from the market. We conduct all the analysis and negotiation and provide a comprehensive market assessment report. Once you are satisfied we implement the contracts for you.

### Dedicated energy specialist

Have one of our team monitor the success of your energy needs and support you along the way.

### Billing validation and consolidation

EMP's system ensures the bills you receive from your retailer are accurate.

We consolidate all of the invoices from your various retailers into one easy statement.

### Consumption tracking

Understand your usage and be better informed.

We keep your data so you can own and control it.

### Operational support

We assist with the coordination and management of your energy supply. We liaise with contractors, readers, compliance, and others to ensure a smooth operation.

### General support

We are ready to assist you with general issues and questions regarding your energy.

### Forecasting

Modeling can support your business by helping you to anticipate future use and what that might cost.

### Monthly reporting

Track your cost and usage performance, as well as manage your finances using accruals, GL codes and cost centres. Stay ahead of your contracts and rates, while keeping up to date with market trends.

What are your energy needs?  
We are happy to help.
